

Greeting by the ATF spokesman

N.Terunuma,KEK

- First, thank you very much for your attendance in this meeting.
- We will discuss a lot of issues for ATF and ATF2 goals, and will share the more clear images to approaching them.
- In 2012, especially in the ATF2 dedicated runs, we have learned a lot of things to do.
- Then the 70 nm beam was realized as a result of the efforts on the international collaboration.
- We should keep our activity as much as possible to realize goals.

What I would like to ask our people is How to spend time for goals.

- Shall we have more continuous runs?
 - It may be yes. When? How often? Who can?
- What should we do in Spring runs?
 - usually, less people in this period but...
 - 7 weeks in January to March
 - **this is 1/3 of the ATF annual operation!**
